Introduction to Probability Joseph K. Blitzstein, Jessica Hwang, 2014-07-24 Developed from celebrated Harvard statistics lectures, Introduction to Probability provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

Where Is My Flying Car? J. Storrs Hall, 2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In Where Is My Flying Car?, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture

hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.

Let Them Play Denita Dinger, Jeff A. Johnson, 2013-01-15 Playtime is focused, purposeful, and full of learning. As they play, children master motor development, learn language and social skills, think creatively, and make cognitive leaps. This (un)curriculum is all about fostering children's play, trusting children as capable and engaged learners, and leaving behind boxed curriculums and prescribed activities. Filled with information on the guiding principles that make up an (un)curriculum, learning experience ideas, and suggestions for building strong emotional and engaging physical environments, *Let Them Play* provides support to those who believe in the learning power of play. Jeff A. Johnson spent twenty-five years as a child care provider in center- and home-based programs. He now works full time as an author, keynote speaker, podcaster, toymaker, and early learning advocate. He is the author or coauthor of six other Redleaf Press books. Denita Dinger has been a child care provider for more than fifteen years and operates a family child care program. For the last five years, she has been a frequent keynote speaker at early childhood conferences, focusing on the topics of hands-on learning and learning through play.

Comfort Zones Pamela Donoghue, 1997 This moving collection of linked stories presents vignettes of everyday life for a diverse group of ordinary and extraordinary folks: fly-fishermen, bootleggers, World War II veterans, waitresses, undertakers, a nurse who looks like Ringo Starr, dog trainers, Elvis impersonators. Donoghue's well-developed characters reveal the essence of human vulnerability within contemporary families. How do men see women? women see children? children see adults? The settings -- rural and urban, American and Canadian -- are evoked in rich detail.

A Supposedly Fun Thing I'll Never Do Again David Foster Wallace, 2009-11-23 These widely acclaimed essays from the author of *Infinite Jest* -- on television, tennis, cruise ships, and more -- established David Foster Wallace as one of the preeminent essayists of his generation. In this exuberantly praised book -- a collection of seven pieces on subjects ranging from television to tennis, from the Illinois State Fair to the films of David Lynch, from postmodern literary theory to the supposed fun of traveling aboard a Caribbean luxury cruiseship -- David Foster Wallace brings to nonfiction the same curiosity, hilarity, and exhilarating verbal facility that has delighted readers of his fiction, including the bestselling *Infinite Jest*.

Bedtime Math: A Fun Excuse to Stay Up Late Laura Overdeck, 2013-06-25 Bedtime Math wants to change the way we introduce math to children: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, I'm just not good at math! For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.

1-2-3 Peas Keith Baker, 2014 Busy little peas engage in their favorite activities as they introduce the numbers from one to 100.
